PROPERTIES

ArmaFix Ecolight to thermally insulate pipe bracket

Manufactured with a PET core for greater load capacity

Integrated vapour barrier and self-adhesive seal on both sides of the support to avoid thermal bridges and condensation. Prevents energy losses at joins

By installing ArmaFix Ecolight pipe supports, direct contact between the pipe bracket and pipework is avoided. This eliminates cold spots and prevents condensation from forming on chilled water and refrigeration lines. By helping to control condensation, the risk of corrosion and secondary damage to surrounding goods and equipment can be prevented

RECYCLED PET FOAM

Made using 100% recycled plastic bottles, diverting thousands of tonnes of plastic from landfill.

CLAMPS

ArmaFix clamps are available to match the ArmaFix Ecolight sizes.

INSTALLATION GUIDE

1 Install the support around the pipe, seal the surface using adhesive & remove the backing strip.

2 Close the seam applying firm pressure & push the pipe support into the middle of the clamp.

3 Tighten the screws & before installing the tube, glue the edges of the pipe support to the pipe.

4 Wet seal the butt joins using the adhesive. Install the insulation either side of the support & fit under slight compression.

ArmaFlex RS850

NON-DRIP ADHESIVE FOR FASTER & CLEANER APPLICATIONS.

- Minimum solvent emissions when idle
- Ideal for hard to access areas
- Extended shelf-life
- Reduced solvent content to meet requirements for sustainable building projects
- Superior bonding with Armaflex
- Thixotropic gel based adhesive
- Low viscosity, air drying adhesive

Non-drip one component adhesive in gel form. Specifically developed for ArmaFlex insulation materials based on synthetic rubber.	
Material type	Thixotropic contact adhesive on polychloroprene basis.
Colour	Beige
Material special info	Gel form
Applications	Application on pipes, ducts and tanks with service temperature up to +70 °C. Gluing of all flexible ArmaFlex insulation materials (except HT/ArmaFlex & ArmaFlex Ultima).
Special features	Specially formulated adhesive for uniform and safe seam bonding of ArmaFlex insulation materials.
Assembly	Please observe our installation instructions/product data sheets. Application temperature: ideally +20 °C, not below 0 °C. At temperatures below +5 °C or high humidity approx above 80%), increased condensation may form on the surfaces to be glued or adhesive films. In these cases bonding is poor or impossible. This can be tested by using absorbent paper (blotting or crepe paper). Work should not be carried out on operating plant or areas exposed to strong sunlight. Shake and stir well before use. Apply thinly to the areas to be bonded with a brush or spatula. For contact adhesion press together with force during the contact adhesion time. Detailed application guidance is available.
Remarks	The adhesive achieves its final strength after 24 hours. The system should never be operated during this time and any self-adhesive tape or protective coating (exception: ArmaFinish 99), should only be applied after the time has elapsed.
